ABOUT SOLLI CONCEPTS

Solli is a design studio dedicated to the creation of hand-crafted, timeless furniture showcasing the innate beauty and authenticity of wood and its unique ability to fuse with other natural materials.

At Solli, a product is designed very much from the heart. Function and design are of equal importance and we believe one cannot work without the other. The intended primary function of the product is the inspiration for the design to take form. Each Solli piece has been invented by the company's founder Soheli Contractor who has also constructed most of the pieces himself. He likes to keep things simple by taking everything out that is not needed to present an elegant yet simple piece for someone to enjoy.

Solli has to its credit, many multi-national and corporate clients who are looking for quality, personality and a uniqueness to the product that reflects the nuances of the both the maker and the user.

At its core, Solli strongly believes in not putting waste in to the environment. This drives the entire design and production process. By trying to avoiding trends, we look to create statement pieces that are built to last with the promise that it will still look good in a hundred years.

Every Solli piece is hand-finished, drawing inspiration from both modern and traditional woodworking techniques. The use of screws and nails is avoided where possible, instead using joinery techniques to fuse pieces together. This not only makes the joints stronger but is also aesthetically pleasing. The careful attention to detail combined with high quality materials and craftsmanship ensures that the product requires very little effort in terms of special care and maintenance.

CUSTOM WORK

Much of our work is made to order/custom made.
As such, the current catalogue is customisable.

We can vary the overall dimensions, wood, finishes, storage orientation, colours and configurations to suit our clients' needs, whilst ensuring the functionality and aesthetic are never compromised.

BESPOKE WORK

We work with both individuals and corporates on bespoke projects.

A bespoke piece is something that takes shape from a blank canvas keeping the client / project in mind.

We will hold an initial meeting to understand client requirements. Our key objectives are to understand both the clients' aesthetic sensibilities and the primary function of the piece being commissioned. Where possible, we will also visit the installation site to get a better sense of the overall space.

Once the final design and expected time frames have been agreed upon, work begins.

Our partnership does not end at delivery and installation. We work with all our clients on any details or modifications that maybe needed. We want our clients to enjoy the furniture as much as we enjoy making it.
